**Feature To Be Implemented in the Tool to Aid Decision Making:**

This figure illustrates two recommendation examples from a possible solution addressing preference-centric task recommendation (Top: earning-driven worker; Bottom: learning-driven worker).

Each bubbling corresponding to a recommended new task. The number on a bubble is its rank. The size of a bubble can indicate the **worker's potential winning chance** for the corresponding task. In another view, the size of a bubble can indicate the **task prize** for the corresponding task.
